Professional Summary

Junior Data Engineer with hands-on experience in Python, SQL, data cleaning, validation, transformation, and ETL workflows. Built data-processing and API-based projects using Pandas, PostgreSQL/SQLite, FastAPI, Docker, and GCP to support reliable data delivery for analytics and AI applications.

Technical Skills

- **Programming:** Python, SQL, C++ (Basic)
- **Data Engineering:** ETL/ELT, Data Extraction, Transformation, Cleaning, Validation, Reconciliation, Workflow Automation, Regex
- **Data & Analytics:** Pandas, NumPy, Power BI, Excel, Statistical Analysis, Automated EDA
- **Databases:** PostgreSQL, MySQL, SQLite, Oracle SQL
- **Cloud & DevOps:**GCP Cloud Run, Docker, Docker Compose, Git, GitHub
- **APIs & Frameworks:** FastAPI, REST APIs, Flask
- **AI/ML:** NLP, LangChain, RAG,Scikit-learn, TensorFlow, XGBoost, NLP, Gemini

Professional Experience

Data Engineer Intern Jun 2026 – Present
Alten India *Onsite*

- Support data-processing workflows involving extraction, transformation, cleaning, and preprocessing across multiple data sources.
- Use Python, Pandas, and NumPy to automate data preparation and preprocessing tasks.
- Perform validation and reconciliation checks to improve dataset accuracy, consistency, and completeness, preparing data for downstream analytics and AI/ML applications.

Data Scientist Intern Mar 2025 – Aug 2025
Greatway Software Solution *Pune, Maharashtra*

- Performed data extraction, cleaning, tagging, deduplication, and anomaly identification on structured and unstructured datasets using Python, Pandas, and Regex.
- Monitored data trends and anomalies across ML workflows and prepared root-cause reports for cross-functional stakeholders.
- Developed Power BI and Excel reports, reducing manual reporting effort by 35%; coordinated batch-job scheduling and pipeline execution across parallel processes.

Projects

E-Commerce Sales Analytics Chatbot *Deploy Link* Sep 2026

- Built an AI chatbot that converts plain-English questions about the Brazilian Olist dataset into business insights and visualizations.
- Designed a dual-agent architecture (Gemini LLM agent plus deterministic regex/keyword fallback) and implemented MCP with 6 analytics tools covering orders, sellers, payments, reviews, and delivery.
- Developed deterministic chart-selection and dashboard-pinning logic; containerized the app with Docker Compose.

GCP-Integrated Job Scraper & NLP Match Engine *GitHub* Jan – Apr 2026

- Built a FastAPI data pipeline collecting job data from 100+ portals using Workday, Eightfold, and JSON-based crawlers, with asynchronous scheduling, queue management, and structured pipeline logs.
- Developed an NLP ranking service using all-MiniLM-L6-v2 and cosine similarity to rank jobs against user requirements.
- Designed for GCP Cloud Run/Cloud Functions deployment with automated email alerts and location-priority sorting.

Malicious URL Classification System Python · Scikit-learn · XGBoost · REST API *Deploy Link* Sep – Dec 2025

- Built and evaluated Random Forest, XGBoost, SVM, Logistic Regression, and Naive Bayes models using TF-IDF and regex features; achieved 80% accuracy.
- Deployed the model via a Flask REST API for real-time prediction; performed EDA with Pandas/NumPy and reported results in Power BI.

AI-Powered Disease Recognition System Python · GenAI · RAG · LangChain *Deploy Link* Mar – Aug 2025

- Multi-modal pipeline: OCR → semantic chunking → vector store → LLM generation; achieved **92% accuracy**, reduced diagnostic review time by **40%**. Integrated operational health dashboard for monitoring and reporting.
- Built **LLM-powered chatbot** delivering personalised diagnostic summaries with prompt engineering & context-window optimisation.

Education

B.Tech – Computer Science Engineering (AI & ML), CGPA: 7.86/10.0 Jun 2021 – May 2025
DIEMS College, Dr. Babasaheb Ambedkar Technological University, Maharashtra

Certification

- Google Cloud Career Launchpad – Data Analyst Track Certificate View Certificate
- Data Science Essentials with Python View Certificate
